Tests Requested Cocksackie B Virus Antibodies; Echovirus Antibodies; Redondo Beach, CA; Venipuncture;

TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
<b>Cocksackie B Virus Antibodies</b>					
Cocksackie B Virus, Type 1	< 1:10			< 1:10	Y8
Cocksackie B Virus, Type 2	1:80			< 1:10	Y8
Cocksackie B Virus, Type 3	< 1:10			< 1:10	Y8
Cocksackie B Virus, Type 4	1:320			< 1:10	Y8
Cocksackie B Virus, Type 5	1:40			< 1:10	Y8
Cocksackie B Virus, Type 6	< 1:10			< 1:10	Y8

TEST INFORMATION: Cocksackie B Virus  
 Single positive antibody titers of greater than or equal to 1:80 may indicate past or current infection. Seroconversion or an increase in titers between acute and convalescent sera of at least fourfold is considered strong evidence of current or recent infection.

<b>Echovirus Antibodies</b>					
Echovirus 6	1:20			< 1:10	Y8
Echovirus 7	< 1:10			< 1:10	Y8
Echovirus 9	1:20			< 1:10	Y8
Echovirus 11	1:40			< 1:10	Y8
Echovirus 30	< 1:10			< 1:10	Y8

TEST INFORMATION: Echovirus Antibodies  
 Single positive antibody titers of greater than or equal to 1:80 may indicate past or current infection. Seroconversion or an increase in titers between acute and convalescent sera of at least fourfold is considered strong evidence of current or recent infection.
